

DoD CYBER CRIME CENTER (DC3)

Cyber Training Academy

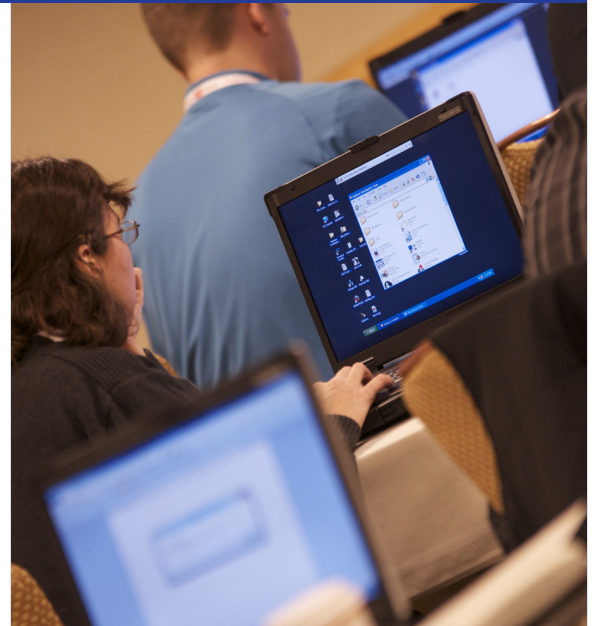

CTA FACT SHEET

The Defense Cyber Crime Center – Cyber Training Academy’s mission is to design, develop and deliver the highest quality cyber training available in the Department of Defense to DoD personnel whose duties include ensuring Defense

information systems are secure from unauthorized use, counterintelligence, and criminal and fraudulent activities.

The DC3 Cyber Training Academy (CTA) is a DoD organization, under the U.S. Air Force Inspector General. CTA’s executive agency is the United States Air Force, and our PSA is the DoD CIO. The Academy has been operating since 1998, and has been instrumental in training Defense Criminal Organizations (DCIOs), Military Department Counterintelligence Organizations (MDCOs), Cyber Mission Forces, Cyber Protection Teams, Mission Defense Teams, and many other agencies across the greater DoD enterprise.

CYBER TRAINING

CTA's curriculum is divided into three skill levels: core, intermediate, and advanced, with courses and curriculum in digital media forensics, computer technologies, intelligence and network defense.

ACCESSING CTA TRAINING — Students apply for CTA training via CTA's Cyber Learning Management Environment (CLME) accessible on the internet at www.dcita.edu. CTA's website is the student's primary means of discovering and accessing all CTA content and courses.

CYBER-CAST WEBINARS — Through the CLME, CTA routinely provides 'Cyber-Casts' which are pre-recorded webinars that feature Academy instructors presenting current cyber topics such as new software demonstrations, cutting-edge techniques, and emerging threats and technologies. These Cyber-Casts are available to all personnel with CLME accounts at no cost.

ACCREDITATION — CTA is accredited by the Council on Educational Occupation, the International Association for Continuing Education and Training (IACET), CompTIA, and the American Council on Education. Select Academy courses confer College Credits to students, and Cyber-Casts and other learning materials provide students with continuing education units which can be used to maintain DoD Directive 8140 certification requirements.

LEARNING MORE — To learn more about DC3/CTA and to take advantage of the many cyber-training opportunities available, please visit www.dcita.edu.

TOTAL TRAINING HOURS SINCE INCEPTION — 2,931,731

TOTAL ORGANIZATIONS TRAINED SINCE INCEPTION — 591
